WATER RIGHTS
SALT LAKE

To The Divison of Water Rights 2-11-14

I have been protesting wells in area 55 since the mid "90's".

I have nothing left to say about what has happened to area 55 and the people who live here.

The State and Cities have allowed more water transfers and well's to be devolped and some that by your own laws that should have reverted back to the state to be used for development.

Thier is still alot of people totaly dependent onthier small wells for thier only source of water.

We are at the point of taking more than thier is. And I think allowing Cities and some Individuals to monitor thier own wells that produce more than 100 ac-ft is totally out of line because they will not be honest.

It is way past time for the State and Cities to drastically cut back on growth untill something can be done.

This is in reference of Jan. 15-2014 meeting.

Thank you. Todd Evans 26 S. 2300 W.
