RE: Water use reporting and mapping required under Water Right 25-9078

Dear Water User:

The State Engineer approved Water Right 25-9078 subject to conditions of approval stated in the Memorandum Decision issued by the State Engineer on May 11, 2005. In summary, Condition 2 established the flow limit of this water right to be limited to 4.45 cfs. Condition 5 required Nibley City to map its new annexation areas and define both irrigated and non-irrigated lands, and demonstrate that the water rights required to provide replacement water are sufficient for replacement. Condition 6 indicated replacement water must remain undiverted in the heretofore source of supply.

The purpose of this letter is to remind Nibley City the 10-yr mapping and documentation is due on or before May 11, 2012. Please submit the required mapping of the lands annexed and removed from irrigation after 2002 and after 2007 on or before the May 11, 2012 due date.

Please also report Nibley City's annual well water diversions under Water Right 25-9078 immediately after the end of each calendar year (within a few days is acceptable) to Jim Watterson, Lower Bear River Water Commissioner, at (435) 753-3693. The Water Commissioner could read Nibley City's well meter if Nibley City provides him with access to the water meter. Nibley City will receive a distribution assessment (Account 103066) from our office each year for the services of the commissioner in regulating and reporting water deliveries under Water Right 25-9078.

If you have any questions, please call me (801) 538-7469 or Will Atkin, Regional Engineer, (435) 752-8755.

Sincerely,

Ben Anderson, P.E.
Water Rights Distribution Engineer
