Dear Mr. Jerry D Olds:

I am writing this letter regarding the water rights meetings held in Enterprise on March 13 and August 6, 2007. According to the water rights plan for the Escalante Valley, it says that it will take water away from some of our farmers and from some of the people who live in this Valley. I am very concerned about the impact this would have in our area.

If the state approves this water rights plan I understand that many farmers will lose half or all of their water and some of the homes in the Valley will lose their water too. I am a student at Enterprise High School. I hope after college to move back here, I am afraid that there will not be a town to come back to if they take our water away. There are a lot of farmers in our Valley and farm related jobs here. It would ruin the farmers if they lost their water.

Please keep our Valley in mind when deciding this issue. Water is a precious commodity in this Valley. Thank you for reading my letter. Please make this letter a matter of public record. Thank you.

Sincerely,

L. Sean Jones
