Re: [unclear]

Dear Mr. Tracy:

I was very pleased to see an article in the Deseret News of Thursday, September 22, giving an account of the action taken by the Governor in opening the Weber and Bear River drainage areas for water rights claims.

You will recall that some months ago I called on you in regard to that matter, particularly in behalf of the San Francisco Chemical Company, phosphate operators in Rich County.

The news item referred to stated that the application of the San Francisco Chemical Company for the right to drill wells near Woodruff would probably be cleared as a result of the Governor's order.

I appreciate the fact that your interest and effort in this matter has been the principal factor in making this water available for industrial and other uses.

With best personal regards, I am

Very truly yours,

Miles P. Romney

Miles P. Romney, Manager
