

sedimentation pool, and the water stored therein shall not be available for withdrawals by either party;

(b) The Division shall have the exclusive right to the use of the 2,300 acre-feet of storage space for the maintenance of a permanent fish conservation pool, which water has been provided for by the Corporation from its vested water rights. Additionally, the Division shall have the right to utilize all of the water stored in the reservoir specifically including the sedimentation pool as set forth in subparagraph (a) hereof for fish culture purposes, subject to the Corporation's rights to withdraw its water from the irrigation pool as set forth in subparagraph (c) hereof in accordance with the needs of its shareholders.

(c) The Corporation shall have the exclusive right to use the 7,080 acre-feet of active storage space, which shall be comprised of the 6,000 acre-foot space originally allocated to the Corporation, plus all of the additional 580 acre-feet of storage capacity created through the construction of a larger reservoir plus 500 acre-feet out of the original 2,000 acre-foot sedimentation pool which pool by agreement has been reduced to 1,500 acre-feet as set forth in subparagraph (a) hereof;

### 3. Allocation of Existing Sedimentation Loss.

The Lower Gunlock Reservoir has been in operation approximately eight years, and during that period of time substantial amounts of sediments have been deposited within the reservoir, reducing the actual storage capacity by approximately 500 acre-feet. The parties agree to allocate the existing sedimentation loss in proportion to their allocated storage space in the reservoir. Accordingly, the Corporation shall reduce its active storage by 300 acre-feet, which will leave 6,780 acre-feet of available storage capacity. The Division shall similarly reduce its allocated storage space by 200 acre-feet, which will leave the Division with 2,100 acre-feet of available storage capacity in its fish pool.
