RE: PROPOSED POLICY CHANGES WATER RIGHT AREA #73

The committee has met a couple of times and discussed the draft Groundwater Management Plan for Cedar City Valley. This committee is still discussing some of the document but has agreed on the following recommendations:

1. Depletion Reduction Schedule
 - a. Phase One (1) 25% reduction to begin in 20 years (October 2040).
 - b. Phase Two through Four (2-4) would be 25% reductions in 15-year increments.
2. Change Application and Appropriation Policy Modifications (page 5 ¶ 3)
 - a. The committee agreed that new appropriations of water to recharge & recover in Cedar Valley should be approved if the water has been known to historically end up in the terminus lakes of Quichapa and Rush.

Paul Monroe
Secretary GMP Committee,
Cedar Valley, Iron County, Utah.
