Re: Extension Request - Comments on the Draft Groundwater Management Plan for the Parowan Valley

Division of Water Rights,

We request an extension for submitting comments on the pending Parowan Valley Groundwater Management Plan. The statute does not appear to set a hard and fast deadline for comments, except that there must be a minimum of 60 days from the date the meeting is noticed. The Cache and Box Elder Groundwater Management Plans have allowed 90 days for public comment.

In the interest of our Parowan Valley clients, Clyde Snow requests a short extension of the 60-day comment period through the week of March 13. This extension is necessary to allow for the distribution and review of our comments throughout our client group before formal submission.

We appreciate your consideration.

Sincerely,

Robert DeBirk
