Utah Division of Water Rights
Subject: Box Elder County (Area 29 Policy)
1594 West North Temple Suite 220
P.O. Box 146300
Salt Lake City, Utah 84114-6300

To whom this may concern:

Is Loren Cox going to shut down the government controlled Economic Development Program? If he is really concerned about our water situation, this is the first program to go. This government program has created our water issue shortage, as well as traffic congestion, pollution, crime, higher taxes to pay for infrastructure, etc.

This government program is unfair and unjust because the government is picking winners and losers in businesses; granting some businesses tax exemptions, incentives & advantages. The government has abandoned the true and correct principle of the free-market system for a fascism system which is contrary to our patriotic American way; Liberty

WATER RIGHTS
SALT LAKE

SCANNED ML

and Justice for all.

When you bring more businesses and people to the second driest state in the country, what do you think is going to happen?

The United Nations wants to control all the land, air, water and people. Utah has and still is adopting its agenda. Utah is a model state for the United Nations Agenda 2030. It use to be Agenda 21, but that year has come and gone.

The next program that needs to go is the Water Conservancy District. It was established in Box Elder County in 1988. We have been forced to pay into this government program for 35 years and all we have to show for it is six wells that service 400 citizens. We have been forced to pay for other citizens water projects.

Cache County put in their Water Conservancy District only four years ago. This socialist program should be defunded and eliminated with the wells returned to the private water companies and the citizens

money returned to them instead of the government using our tax dollars against us by buying up water and putting it under the government control.

The Lord is the only one that can help us with our water shortages. How willing do you think he is going to be when our own representatives are trying to destroy this Promised Land from within?

I feel our representatives have violated their oaths of office and orchestrated our own demise from within.

Will we change? That will be revealed with time.

Respectfully,

DeAnna Hardy
