WATER RIGHTS  
SALT LAKE

Dear Mr. Olds:

I am writing you regarding the Beryl/Enterprise groundwater plan issue. I would like to request to you that the groundwater management plan that has been presented for the area is revised. I feel that the plan should be amended in consideration of the economic and individual water users of the area.

If the proposed groundwater management plan is carried out, the impact on both economic and residential water users will be tremendous. Most of the economic industry in our area is agricultural and requires the use of water. The plans effect will cause many careers and lives to be threatened and in risk of being permanently altered.

My request again is that you take the people of our community into account while taking any actions that will affect our area. I would also like to ask that my letter be made a matter of public record for the public to read. Thank you for considering my concerns on the issue.

Sincerely,

*Michelle Christensen*
