WATER RIGHTS
SALT LAKE

CAWCE

To the State Water Engineers
Kent J Jones:

I would like to express my opinions concerning the water grade from western Beaver Counties limited aquifers to supply Oron Counties suburban growth. I personally believe in states rights (In the constitution where it comes to our state land. I believe the state obviously can control its lands and its natural resource better than the Federal Government (who's far far away.) I believe we are broken down into counties to keep voter representation close to home and the people and that counties should live within their means, especially in the arid west where water is so very limited. Boulder Nevada has put a stop to building and people wanting to reside there buy existing homes. This is due to lack of adequate water. Oron Counties should consider a similar measure if they are concerned about water supply to a burgeoning population. The

water in the western portion
of our country is already
under great pressure from
over ~~appt~~ allocation of
water rights. Ranches are
essential for food production
and they ~~long~~ precede our
current population growth.
First come - first served!
Thank you for your consideration
of these important points

Sincerely
Shes
Graham
