

Supplemental Water Rights and Database Water Use Groups

Quiz Questions

Supplemental rights are water rights that:

- a. Are used on the same place of use during the same period of use.
- b. Are used for a common beneficial use.
- c. May have different points of diversion.
- d. All of the above.

A Water Rights Database **Water Use Group** is:

- a. A group of irrigation companies irrigating corn.
- b. A way to represent one or more water rights in the records of the State Engineer's Office that are being applied to a common Beneficial Use.
- c. A group of water users that divert from the same point on a river.
- d. A group of water rights owned by the same person.

The **Beneficial Use** of a water right is the purpose to which water diverted under a water right is applied and the amount of that Beneficial Use.

- a. True
- b. False

The **Beneficial Use Amount** of a water right is:

- a. The amount of Beneficial Use a water right contributes to a Water Use Group that includes the subject water right.
- b. The number of water rights contained within a Water Use Group.
- c. The seasonal period in which a water right is used.
- d. The sole supply of a water right.

A water right is included in two database Water Use Groups. The first Water Use Group contains two other supplemental water rights. The second Water Use Group contains five other supplemental water rights. The defined Beneficial Use Amount for this water right in the first group is the irrigation of 10 acres within a Group Total of 50 acres. The defined Beneficial Use Amount for this water right in the second group is zero within a Group Total of 80 acres. The ***Sole Supply*** of the water right is:

- a. 130.0 acres
- b. 10.0 acres
- c. It is an Auxiliary water right.
- d. It has no sole supply.

A water right holder may request, in writing to the State Engineer, a review of the State Engineer's Water Right Database entries and the State Engineer's Water Right Files related to a Water Use Group. The request shall include how the submitter believes the records should be modified to be consistent with the State Engineer's Water Right Files.

- a. True
- b. False
