Description \_\_\_\_\_

**11. PLACE OF USE** (By competent survey. Since water rights can be appurtenant to the place of use, be specific and exact in describing the location of each use for the water right owner. Written descriptions and any maps should coincide. The legal description of the property where the water is used should accompany the proof (land deed, tax notice, county plat, etc). Maps must show the configuration of the place of use and the acreage of irrigated land. \_\_\_\_\_

Tax ID or Serial Number: \_\_\_\_\_

**MAPS AND DRAWINGS (Must comply with rules and standards established by the State Engineer.)**

These documents shall be based on competent land surveys, signed and stamped by the licensed engineer/surveyor, and submitted on standard drafting medium that is durable and reproducible with all information legible and in black permanent drafting ink or other media of equivalent durability. Standard mapping conventions must be used (north arrow, scale in both written and graphic form, legend describing any symbols, etc.). Lines must be distinct. Shading or hatching may show irrigated acreage, but the boundary of the irrigated area must be delineated. All property surveys must tie to the section-township-range survey for the area of use, and basis of bearing for the bearings must be shown. Any public roads or other access information near the surveyed property should be shown. The most convenient map sizes are 8 ½" x 11" or 8 ½" x 14", particularly for irrigated acreages of 5 acres or less. Maps of small parcels should be drawn to the largest scale practical and at the least 1"=300'. There must be at least 1¼" margin at the top and ½" margin on the sides and bottom. The title block should appear on the lower right-hand side of the page (the short side being the bottom). If a larger map is needed, the dimensions should be 24" x 36" with the title block in the lower right-hand corner (the long side being the bottom). The title block must include the water right number, application number, survey date, the applicant's name, proof professional's name and license number, and the section, township, and range of the described parcel(s). Maps must not be folded.

12. **WATER MEASUREMENT** (Provide sufficient details to enable the State Engineer to compute the quantity of water measured in each case, including current meter notes, rating table, field observation notes, etc. Measurements must be made by engineer/surveyor or his/her authorized representative and may be made by vessel, weir, meter, rated flume, reservoir capacity table or other standard method. Where the source of supply is of fluctuating nature, a series of measurements should be submitted to show the variation and period(s) during which flow is available. The maximum diverted flow and/or acre-footage cannot exceed that approved in the application. If larger amounts are measured, control devices should be described.

13. **EXPLANATORY** (Additional space for above items and to define use of water such as crop rotation plans, facility plans and capacities, operation schedules, lot numbers, mining claim numbers, sewage systems, etc. Use additional 8 1/2" x 11" pages if needed.) \_\_\_\_\_
