**MAPS AND DRAWINGS (Must comply with rules and standards established by the State Engineer.)**

These documents shall be based on competent land surveys, signed and stamped by the licensed engineer/surveyor, and submitted on standard drafting medium that is durable and reproducible with all information legible and in black permanent drafting ink or other media of equivalent durability. Standard mapping conventions must be used (north arrow, scale in both written and graphic form, legend describing any symbols, etc.). Lines must be distinct. Shading or hatching may show irrigated acreage, but the boundary of the irrigated area must be delineated. All property surveys must tie to the section-township-range survey for the area of use, and basis of bearing for the bearings must be shown. Any public roads or other access information near the surveyed property should be shown. The most convenient map sizes are 8 1/2" x 11" or 8 1/2" x 14", particularly for irrigated acreages of 5 acres or less. Maps of small parcels should be drawn to the largest scale practical and at the least 1"=300'. There must be at least 1/4" margin at the top and 1/2" margin on the sides and bottom. The title block should appear on the lower right-hand side of the page (the short side being the bottom). If a larger map is needed, the dimensions should be 24" x 36" with the title block in the lower right-hand corner (the long side being the bottom). The title block must include the water right number, application number, survey date, the applicant's name, proof professional's name and license number, and the section, township, and range of the described parcel(s). Maps must not be folded.
